The PHP Classes site

gives the present

CERTIFICATE

to

MALIK UMER FAROOQ

For having ranked Number #2
in the edition of February, 2018 of the

PHP Innovation Award

for the PHP package

PHP Screenshot URL Handler

Nomination reason: Capturing screenshots of Web pages is useful for site developers. It helps understanding how Web site users see their Web site pages. Eventually, that may be useful to discover bugs or issues with the way the pages are presented to the user and that may not be alright. There are many solutions to capture screenshots of Web pages. Using the Google Page Speed API is often better because internally Google uses the Chrome browser to capture exactly the way...
