The PHP Classes site

gives the present

CERTIFICATE

to

MUHAMMAD UMER FAROOQ

For having ranked Number #5
in the edition of February, 2019 of the

PHP Innovation Award

for the PHP package

Whoops

Nomination reason: Many PHP developers use IDE tools to become more productive. One situation that they need to handle frequently is to debug the code they have developed by fixing errors of code that is not working. This package makes it easier to debug code that generates errors by allowing to quickly locating code that generate errors. It outputs links that when clicked will make the Sublime editor open the source code file that generated errors in the lines of the code with thos..
